Re: Boiler Cleanings

Please be advised that the boilers will be shut down on Wednesday, July 25, 2018 from 8:00AM through 3:00PM. This will result in the loss of hot water as it is used. This will not affect the cold water.

The shutdown is necessary in order to perform the annual cleanings of the fireside surfaces of the boiler's, breeching and chimney base.

The boilers will need time to cool down so that the contractors can work on them.

We realize the inconvenience that this may cause. However, performing the above allows our boilers to perform more efficiently and safely, while decreasing the potential of mechanical failure.

We apologize for any inconvenience that this may cause and thank you for your cooperation.

Joe Giampietro

Facilities Manager
