Re: Back Flow Device Test

Please be advised that the cold water supply will be turned off on **Friday, September 10, 2021**, between the hours of 9:00 AM to 3:00 PM for approximately 15-20 minutes provided, there are no unforeseen circumstances.

The shutdown is necessary to perform the annual testing of our backflow devices required by NYS and the Village of Ossining Building Dept.

As the water supply is restored, you may experience discolored water resulting from the disturbance of mineral deposits. This is a common occurrence and will subside as the water is used.

We apologize for any inconvenience this may cause and thank you for your cooperation.

Joe Giampietro

Facilities Manager
