RE: Written Correspondence from Metergy on Recent Electric Bills

---

Management and the Board have been working daily to get an understanding on the recent electric bills that have been distributed for the months of September and October 2023.

It has come to our attention that Elemco was bought out by Metergy Solutions with no official notification to the Board nor Management.

We have received the enclosed letter from Metergy Solutions on the overcharges they have given to us for distribution. We also finally received the charges for December billing and confirmed that credits are in fact coming to the community for their errors.

I would like to thank everyone for their patience and understanding while we investigated this issue all while navigating a new company and its personnel. We will be closely monitoring the electric charges to be sure we do not run into this issue again.

Wishing everyone a Happy and Healthy Thanksgiving and Holiday Season!
